

# INTERNATIONAL GLOBAL SHORTWAVE CLUB

July 1, 2023

Dear Global Shortwave Club member:

It is a pleasure connecting with you again. I hope you are doing well. I have enclosed our latest newsletter; I hope you enjoy it.

Also, I wanted to inform you about the Raddy SP120 Foldable Solar Panel, which promises up to 120-watt high power output and high-purity monocrystalline silicon panels; the SP120 can charge your device fast with 23% solar cell efficiency.

It has a DC port and an array adapter with embedded USB-A, USB-A (QC 3.0), and USB-C; it also gives all the necessary connections and is ready to start charging your devices right out of the box.

It folds into a nice compact size, and during use, you can flip the kickstands on the panels out and plug in what you need powering. It has a built-in smart chip that can intelligently detect your devices and optimize the charging speed while protecting it from overcharging or overloading without using a solar charge controller.

Raddy made the SP120 out of rugged material promising long-lasting service life; it has a waterproof surface, and the well-made structure can withstand a windstorm, helping during any blackout nights.

Although it is a little pricey (\$169.99), if you travel a lot or experience frequent power outages, it is the perfect tool to keep your gadgets operational, allowing you to stay in touch with local weather and news. You can find the SP120 online at [www.radioddity.com](http://www.radioddity.com). Again, we do not sell any merchandise; we only inform you of relevant devices.

I look forward to hearing from you!

Good listening!
